Subbies

COMPLIANCE BUILDS PROGRESS

CONTRACTOR ONBOARDING & COMPLIANCE

Stop chasing subcontractors for expired documents.

Collect, review and track your contractors' compliance documents. One secure link. No contractor logins.

Chasing paperwork is a job on its own

Insurance certificates, licences and workers comp arrive by email, text and photo. Someone files them somewhere. Nobody is sure which copy is current.

It costs an afternoon every time you chase one down.

WHERE IT LIVES TODAY

DOCUMENT	WHERE IT IS	CURRENT?
Public liability Concreter	An email from March	Unsure
Workers' comp Scaffolder	A shared spreadsheet	Unsure
Trade licence Electrician	A photo on someone's phone	Unsure
White card Labourer	A folder in the site office	Unsure

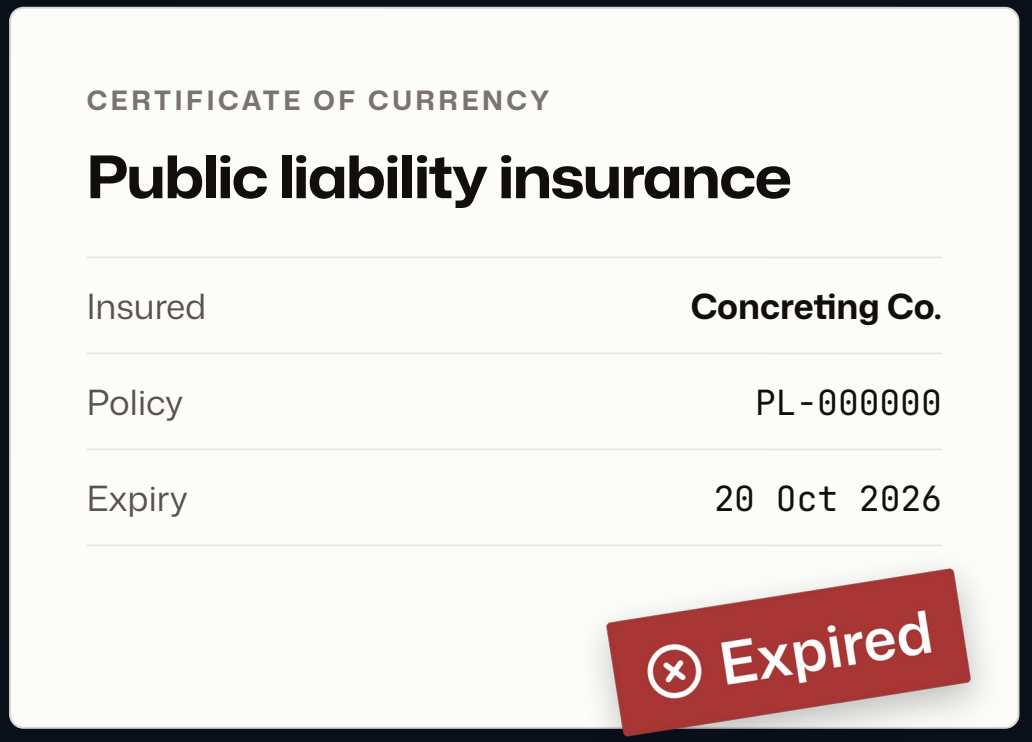

EXAMPLE DATA

Approved once. Expired next year.

Insurance, licences and workers comp all carry expiry dates, and each one restarts the chase. A lapse stays invisible right up until it isn't.

`Collected → Approved → Expires → Chase again`

Then it starts over, for every contractor you use.

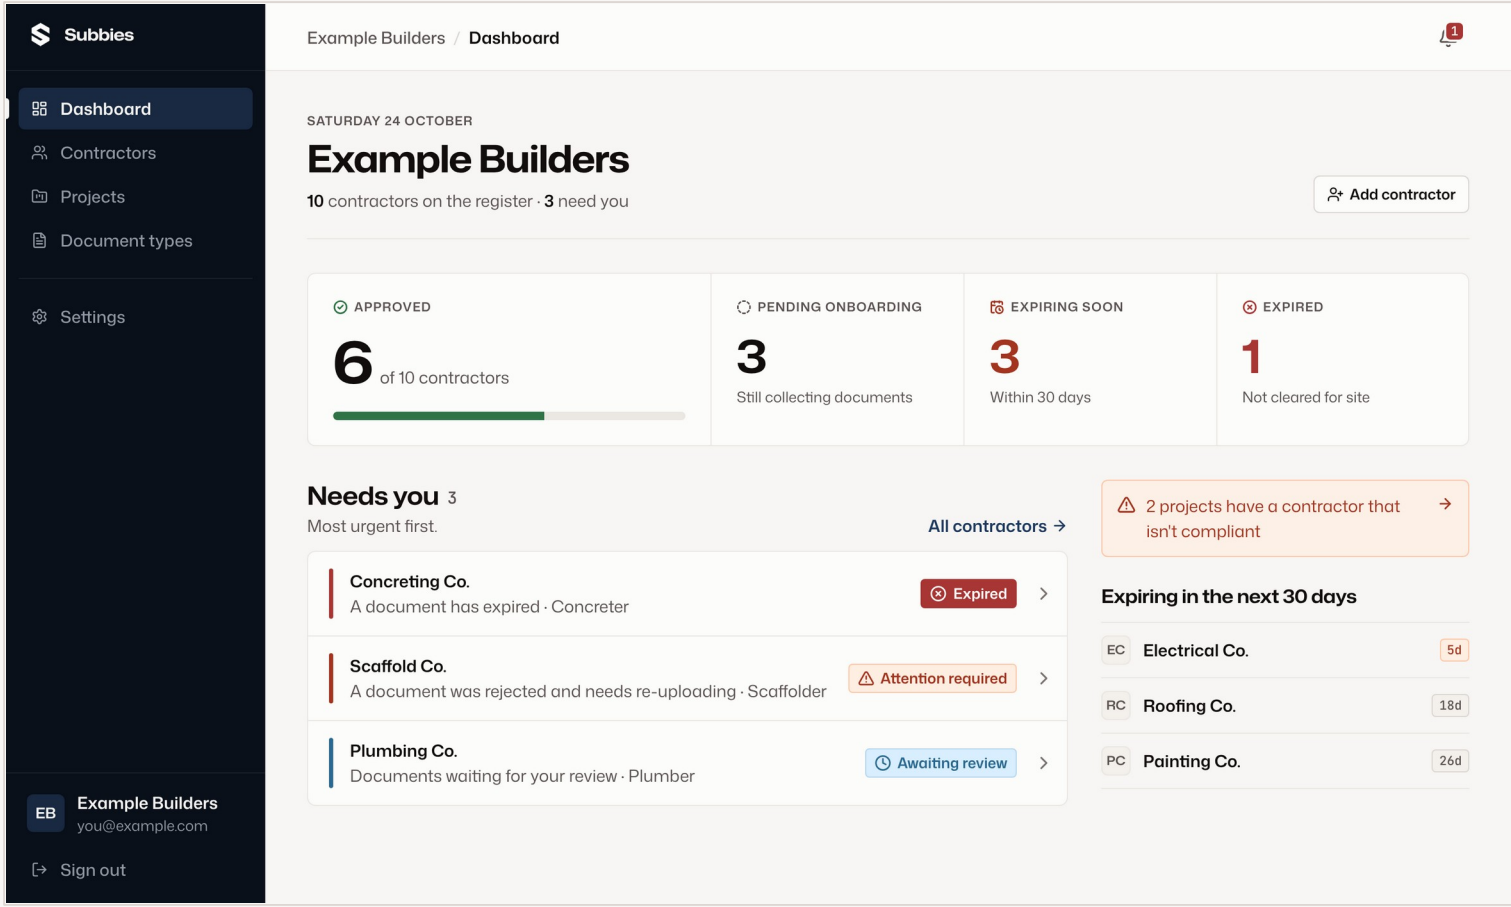

EXAMPLE DATA

Know who's cleared for site

Subbies collects your contractors' compliance documents through one secure link, puts them in one place for review, and reminds everyone before anything expires.

CONTRACTOR LOGINS	**None. One link.**
ACCEPTED FILES	**PDF, JPG, PNG, HEIC**
EXPIRY REMINDERS	**On your schedule**

From request to cleared for site

	01 Onboard	02 Collect	03 Review	04 Track
YOU	Add a contractor and tick the documents you need		Approve with an expiry date, or reject with a reason	See who's cleared and what's expiring
SUBBIES	Emails them a secure upload link	Tells you when files arrive	Emails the rejection reason back	Reminds them before expiry and alerts you if it lapses
CONTRACTOR		Opens the link on their phone, uploads, submits	Re-uploads anything that was rejected	Uploads the renewal on the same link

No contractor account at any step. The link is unique to them and needs no password.

EXAMPLE DATA

No account. No password. Just a link.

They get a plain email from your business, open the link on their phone, and send what's asked for.

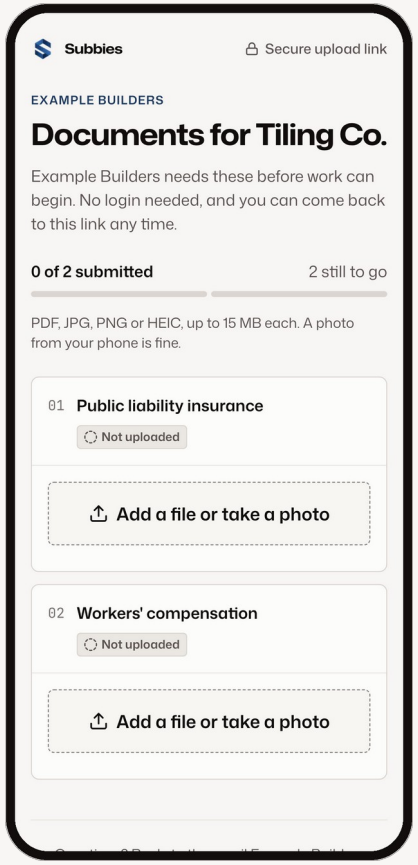

01 **Open the link**

02 **Add a file or take a photo**

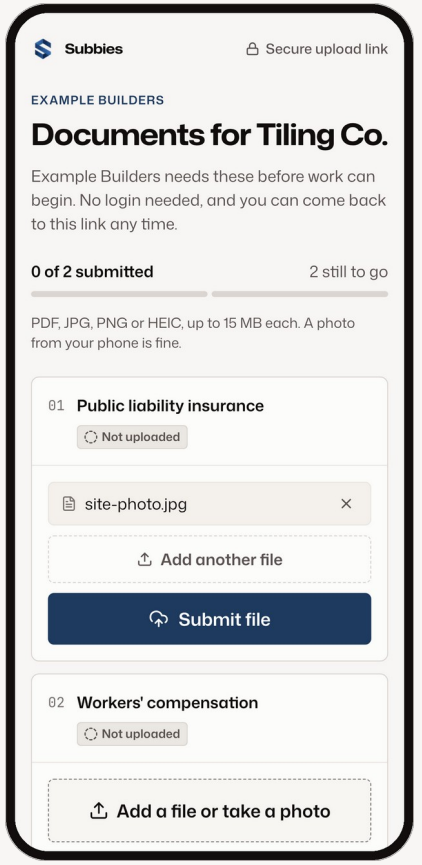

03 **Submit. Done.**

PDF, JPG, PNG or HEIC, up to 15 MB each. The same link still works when a document renews.

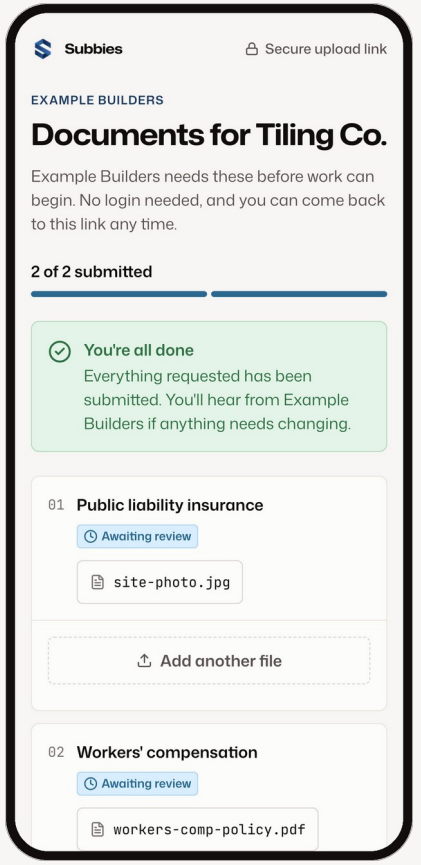

01

02

03

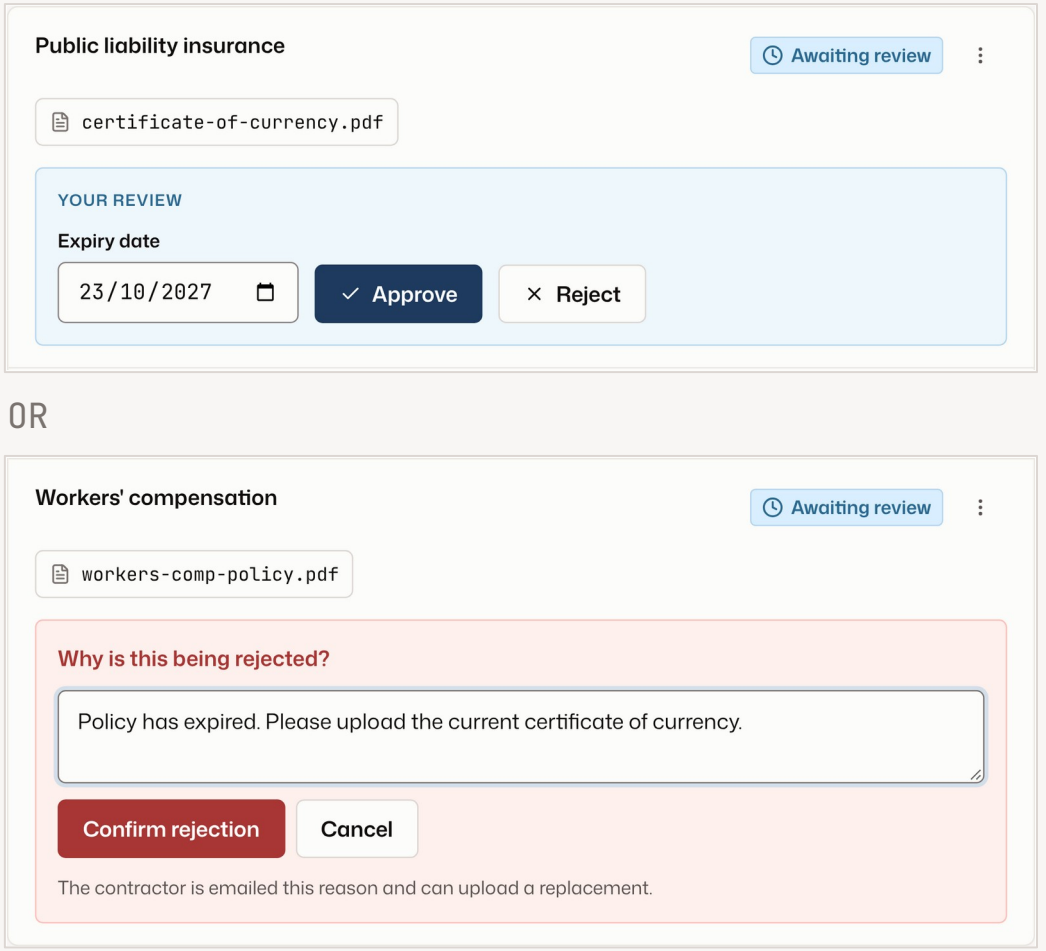

EXAMPLE DATA

Every document checked before it counts

Open each file, set its expiry date and approve it. Or reject it with a reason, and Subbies emails that reason to the contractor.

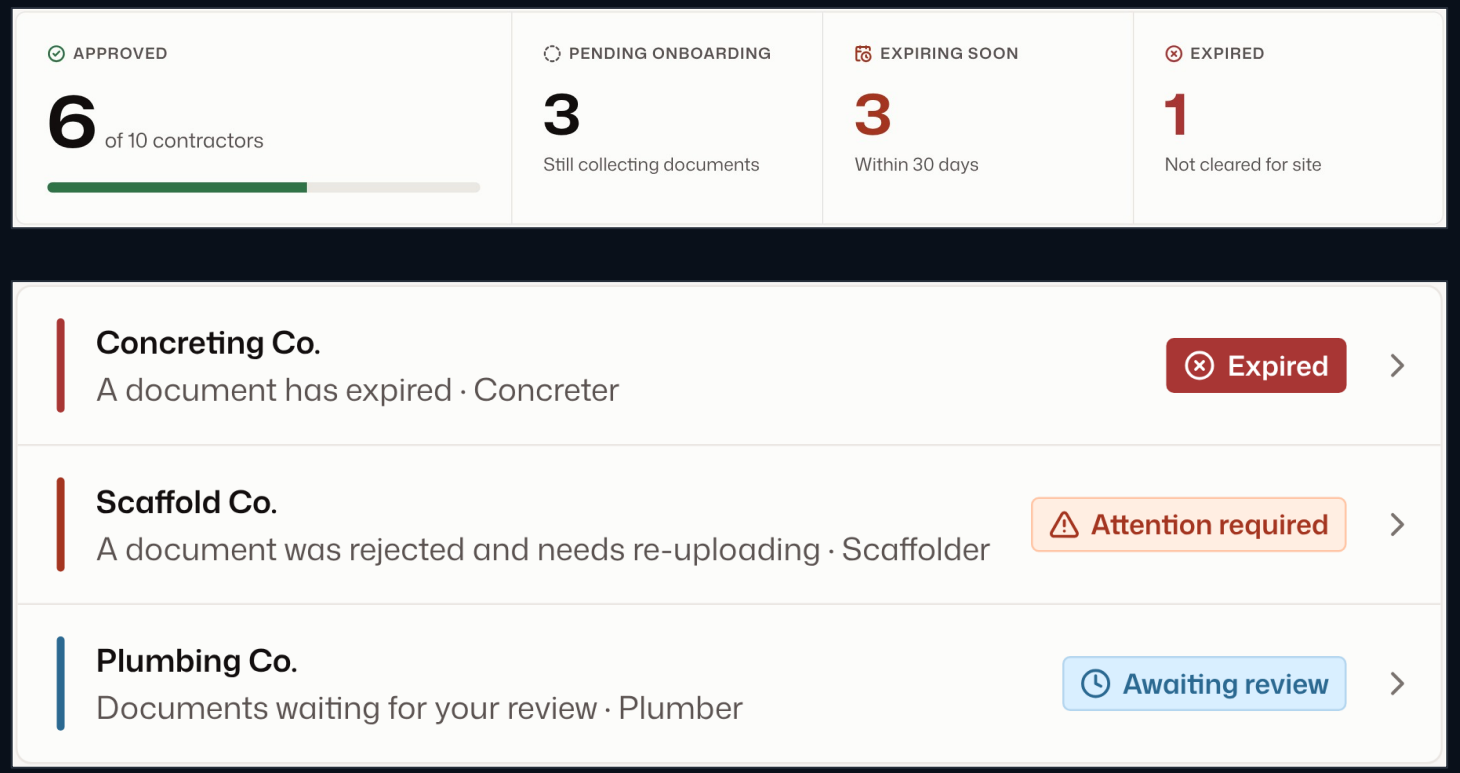

- ✓ Expiry date prefilled from the document type
- ✓ Files open through short-lived secure links
- ✓ Ask for an updated copy while the current one stays valid

EXAMPLE DATA

What needs you, worst first

Expired first, then rejected, then waiting for review. Everything expiring in the next 30 days sits alongside.

EVERY STATUS, IN PLAIN WORDS

Approved
Every document approved and current

Awaiting review
Files are in and waiting on you

Attention required
A document was rejected

Pending onboarding
Still collecting documents

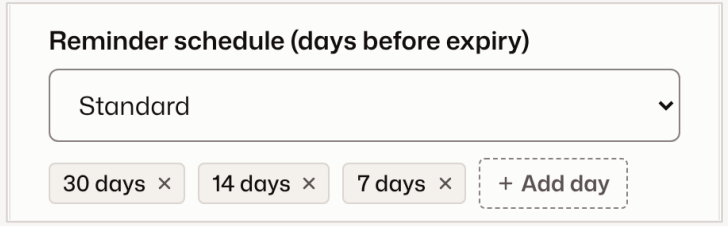

Expired
Not cleared for site

EXAMPLE DATA

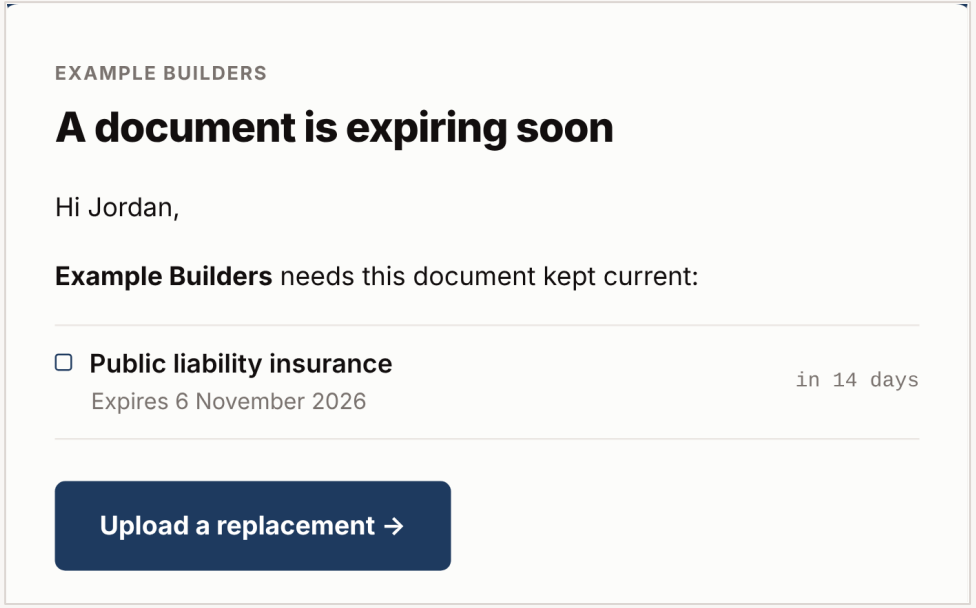

Reminders go out before anything lapses

Choose a reminder schedule for each document type. Subbies emails the contractor ahead of expiry, and alerts you once something lapses.

YOUR SCHEDULE, PER DOCUMENT TYPE

THE EMAIL THE CONTRACTOR GETS

Approved — Expiry date set

30 days — Contractor emailed

14 days — Contractor emailed

7 days — Contractor emailed

Lapsed — You're alerted

Built around the compliance workflow

01 Onboard

- Add contractors with trade, ABN and contact
- Choose the documents each one owes you
- Define your own document types
- One secure link, emailed for you

02 Collect

- Mobile-first upload page
- Several files per document, or a photo
- PDF, JPG, PNG and HEIC
- Notified when files arrive

03 Review

- Files open through short-lived secure links
- Approve with an expiry date
- Reject with a reason, emailed
- Request an updated copy any time

04 Track

- Reminder schedule per document type
- Alert email once something lapses
- Dashboard of what needs you
- One-click resend of requests

AROUND IT

Compliance per project | Activity history | Private notes | Document history | In-app notifications

A focused tool that does one job well

01

Focused

One question: which contractors are compliant. Not job management, accounting or a CRM.

02

Easy for contractors

No app, no account, no password. A link and a phone is all they need.

03

Built around compliance

Status, expiry dates and reminders are the product itself, not a bolt-on module.

04

Sits alongside your tools

Keep the accounting and job software you already use. Subbies works next to it.

EXAMPLE DATA

For anyone who relies on subbies

01 **Builders and construction companies**

Running jobs with a changing crew of trades

02 **Trade businesses**

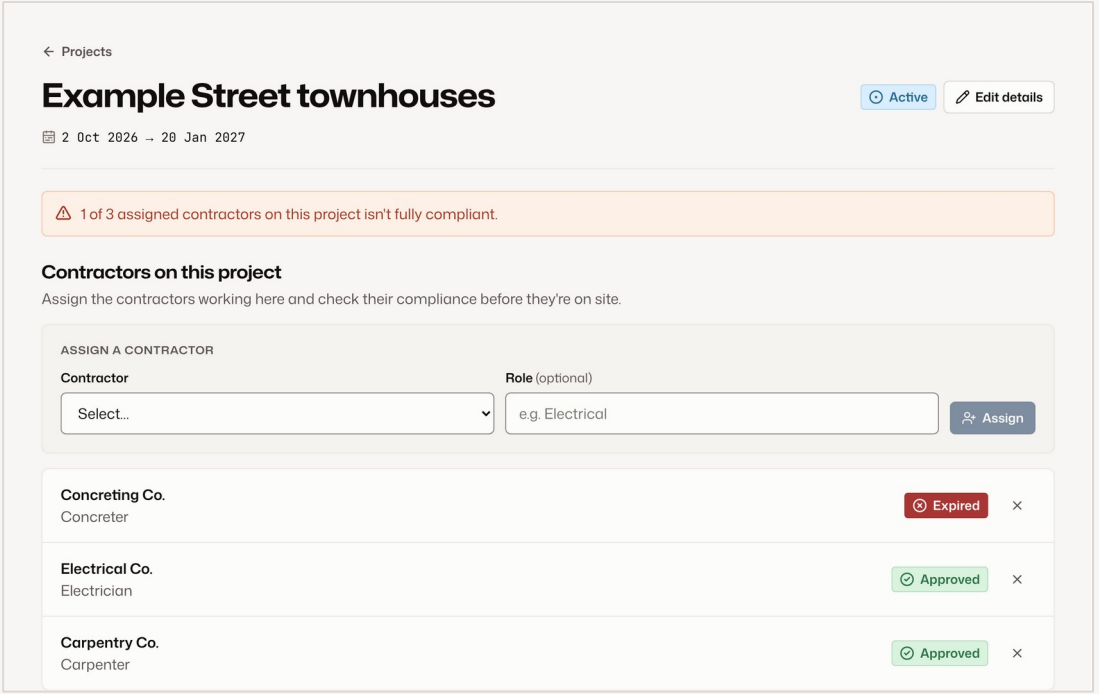

Trades who subcontract part of the work

03 **Property maintenance and facilities teams**

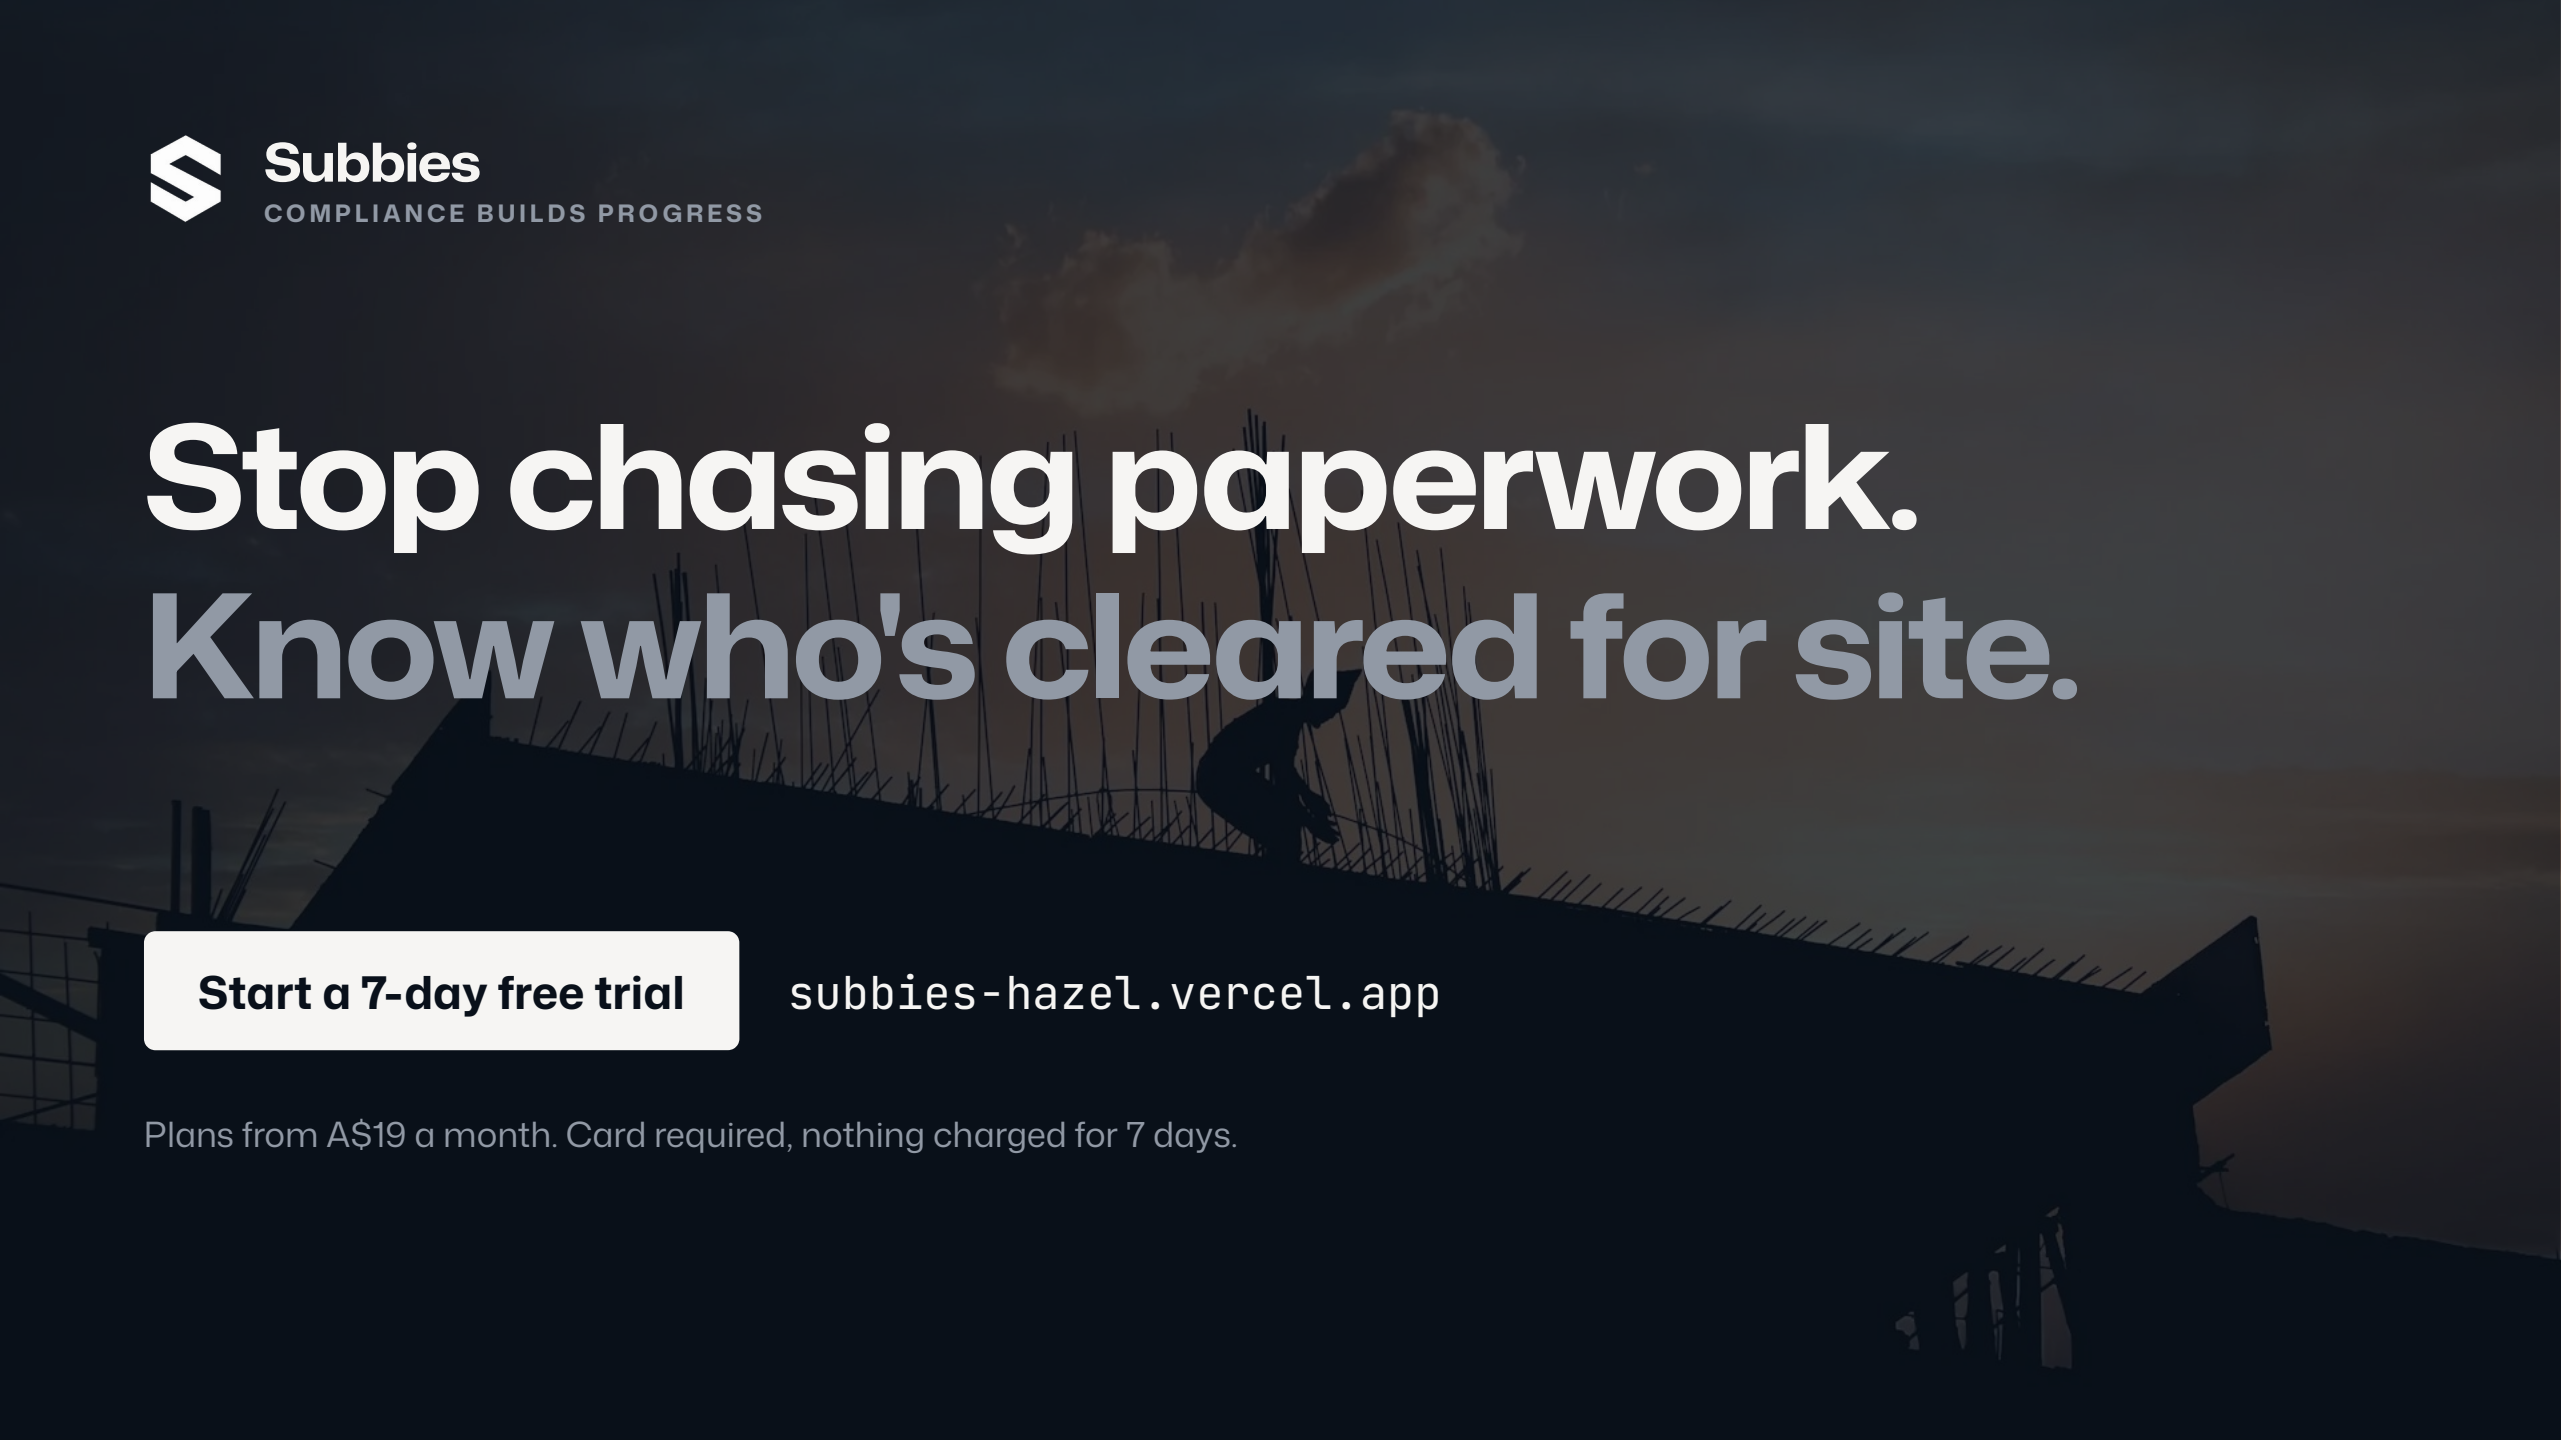

Sending contractors to sites you're responsible for

04 **Anyone managing external contractors**

If their paperwork has to be current, Subbies fits
